

Page 15, third paragraph (lines 10-11)

In Figure 7A, pocket 50 is suspended between anchor cloth 16A and shell 12A.

Elastic 40 holds pocket perimeter edge with anchor cloth circular edge 43.

Claim Claims

1. A protective undergarment, comprising:

an outer layer of fluid-resistant material shaped to conform to the buttock and leg region of a user;

an anchor layer secured to the outer layer and having a shape conforming to that of the outer layer; and

an inner layer of fluid-resistant material with all sides extending inward to form a pocket attached to the anchor layer.

16. A protective undergarment, comprising:

a first, outer layer of fluid-resistant material;

a second layer of material having its peripheral edge attached to the first layer, having a shape conforming to that of the first layer and having a central opening;

a third layer of material attached only at its outer edge by an elastic strip to the second layer and extending beneath the opening toward the first layer, the third layer being proportioned relative to the opening such as to form a pocket beneath the second layer that is larger than the opening.

17. A protective undergarment as in claim 1, wherein the sides are interconnected to form the pocket.

Am

18. A protective undergarment as in claim 17, wherein the sides are interconnected by stitching.
